Manometer Pump

Choosing the right accessories.

Bosch supplies a wide range of accessories to make your Aquatak high-pressure cleaner even more effective and versatile. Before you buy, check out the products below and refer to our handy at-a-glance chart to find the ideal accessories for each job.

WHICH NOZZLE?

Our three different nozzles give you the flexibility to tackle any job.

Jet-fan

The jet-fan nozzle delivers constant pressure and can be adjusted from a wide-fan spray to a single jet. Use the fan spray for cleaning large surface areas. Stubborn dirt can be removed with the powerful jet.

Vario-jet-fan

The spray angle of the nozzle can be adjusted from a wide fan to a jet. The nozzle also offers fully adjustable pressure settings: the high-pressure setting for fast, powerful cleaning, and the low-pressure setting for gentle cleaning.

Roto

The powerful roto-nozzle produces an oscillating jet. Even the most stubborn dirt is washed away in seconds.

WATER FILTER

Fitting directly onto your Bosch high-pressure cleaner, this prevents dirt, grit and sand from entering the water supply and damaging your machine.

HARD-TO-REACH PLACES?

Flexi-jet lance: With the 360° rotatable ball head joint, the flexi-lance comfortably ensures clean results even in hard-to-reach areas.

Website : www.hupshenghardware.com

CLEARING DRAIN PIPES?

Drain cleaner: This ingenious accessory is the quick, easy way to unblock pipes and drains.

RUST AND PAINT REMOVAL?

Sandblaster: This is the ultimate dust-free solution for stripping rust and paint and leaving surfaces ready to be painted.

ATTENTION

To ensure optimum performance of Bosch High-Pressure cleaner, please observe the following start-up and shutdown operation.

Start-up

Do not switch on the machine

Turn on the water tap

1. Press the gun trigger, ensure constant flow of water to clear the air from the machine and water supply hose
2. Switch on the machine

Shutdown

Do not switch off the machine

Turn off the water tap

1. Press the gun trigger to release all the water
2. Switch off the machine
